

### Features

- Full Port Lead Free Brass Ball Valve
- LED light gives continuous status indication
- IP67 weatherproof polyamide enclosure with UV protection
- Multi-voltage capable with auto-voltage sensing
- Long life brushless motor with electronic torque limiter
- Anti-condensation heater
- Manual override with visual valve position indicator
- DIN plug type electrical connections
- Two auxiliary limit switches to confirm valve position
- Energized PTFE ball seats for lower torque and longer life
- Triple PTFE/FKM stem seal packing
- DPS Positioner and BSR Failsafe options available
- Certified per NSF372 and NSF61 for potable/drinking water

### Applications

Electric actuated lead free ball valve typically used for On-Off control of water, air, oil and other media compatible with the materials of construction. These valves are ideal where lead free and NSF approved construction are required for potable drinking water or general industrial applications. Suitable for steam service up to 25 PSI with optional high temperature mounting kit and vacuum service up to 29"Hg. Optional DPS positioners and BSR battery spring return are available. Actuator is designed for 75% duty cycle.

### Operation

Electric actuated valve uses power-to-open and power-to-close, stays in the last known position with loss of power. On receipt of a continuous voltage signal, the motor runs and via a rugged all metal gear system rotates the ball 90°. The motor is automatically stopped by internal cams striking limit switches. On receipt of a reversing continuous signal, the motor turns in the opposite direction reversing the valve position. Valves with optional DPS positioner use an analog input signal to control the position of the ball (flow).

### Construction

<b>Valve Body</b>	Lead free brass C69300
<b>Ball/Stem</b>	316 stainless steel
<b>Ball Seats</b>	PTFE (Teflon) energized with FKM (Viton)
<b>Stem Seals</b>	PTFE (Teflon) with dual FKM (Viton) seals
<b>Actuator Enclosure</b>	Anti-corrosive polyamide, IP67 weatherproof
<b>Position Indicator/Manual Override</b>	Dome style indicator/manual polyamide knob
<b>Fasteners</b>	Stainless Steel
<b>Auxiliary Limit Switches</b>	2 x SPST 3A@125/250VAC, 30VDC resistive load

### Description

Electric actuated Full Port lead free ball valves provide unrestricted flow and minimum pressure loss. Energized PTFE ball seat are designed for low torque and extended cycle life. Leak free triple PTFE/FKM stem seal design. Corrosion resistant electric actuator includes a manual override, valve position confirmation switches, thermostatically controlled anti-condensation heater and over-torque protection. LED light indicates power on and diagnostics. Ball valve is certified for use with potable/drinking water.

### Approvals

#### Actuators

- CE conformance– EN 60204-1:2006
  - Machinery directive
  - Low voltage directive
  - EMC Compatibility directive

- ISO5211 valve mounting

#### Valves

- IAPMO RT certified to:
  - NSF/ANSI 372 - 2011 Drinking Water
  - NSF/ANSI 61 - 2015
  - Weighted average lead content < = 0.25%
- Meets design MSS-SP-110

### Construction Features

### Pressure-Temperature

**Valve Pressure Rating:** 600 PSI (41 Bar)\* non-shock, 1/4" to 2" sizes  
300 PSI (21 Bar) non-shock, 2-1/2" & 3" sizes  
25 PSI saturated steam with high temp kit,  
29" Hg vacuum

**Ball Valve Temperature Rating:** -4 to 366° F (-20 to 186° C)

**Actuator Temperature Rating:** -4 to +158° F (-20 to 70° C)

\*See P/T chart

### Optional Functions

- DPS - Digital Positioner System valve position controlled by 4-20mA or 0-10V input control signal
- BSR - Battery Spring Return actuator fails to a safe position with loss of external power

### Pressure/Temperature Chart (PSI/°F)

P/T Chart

568017C	2-1/2	2.5	320	300	13	IP67	0.43	0.21	1.98	1.63
568018E	3	3.0	551	300	29	IP67	0.33	0.18	1.50	1.22

These unique multi-voltage valves will operate within a voltage range of 24 to 240V AC or 24 to 135V DC, - 0/+ 5%

Cv is the GPM of water at 60° F that will pass through the valve with 1 PSI pressure drop

\* Pressure at 176° F (reduced pressure at higher temperatures-see P/T chart)

## Optional DPS - Digital Positioner System

The DPS Digital Positioner System is available as a factory installed option for Valworx 5610 series electric actuators. Installing the DPS kit will change a standard On-Off type electric actuator to modulating or proportional control. This will allow positioning of the actuator output drive anywhere between 0 and 90° using either a 4-20mA or 0-10vdc input command signal. When using an electric actuated valve with DPS option, the output flow can be adjusted anywhere between 0-100%.

The DPS kit contains a microprocessor based control board and mounting hardware. The control board continuously monitors the analog input and output signals and compares them to the actual physical position of the output drive. An electric motor/gear drive moves the actuator output drive as required to balance the signals and find the desired position. The digital microprocessor ensures highly sensitive and repeatable control. The DPS is installed inside the actuator, under the red cover.

Rotation	0-90°
Input Signal	4-20mA or 0-10vdc
Output Signal	4-20mA or 0-10vdc
Accuracy	3% Full Scale
Linearity	2% Full Scale
Hysteresis	3% Full Scale
Steps	4/20 mA: Min. 150 steps, 0-10V: Min. 98 steps/90°
Impedance 4-20mA	100 Ohms
Impedance 0-10vdc	13K Ohms

Note: Overall accuracy of a valve assembly will vary depending on the type of valve selected and how the valve is mounted to the actuator. Output signals will be in the same format as input signal (ex: 4-20mA input, 4-20mA output).

The DPS system provides an accurate valve positioning function whereby the movement of the actuator is controlled by either a 4-20mA or 0-10vdc control signal. Any change in the control input signal results in a corresponding and proportional change in the position of the actuator (valve).

The DPS positioner has auto-calibration, no need to adjust zero and span settings. An output monitoring signal, in the same format as the input signal is also provided to confirm the output drive position (ex: 4-20mA input, 4-20mA output).

The standard DPS actuator will fail closed with loss of the control signal. Actuator can also be setup reverse-acting (4ma or 0v = open) and fail open with loss of the control signal. These electric actuators will fail in place with loss of external power.

### DPS Positioner Kit Ordering

Kit Stock No.	Input Signal
<b>561101E</b>	4-20mA
<b>561102E</b>	0-10V

- Kits are a factory installed option. The DPS kit is automatically installed and tested when ordered with an actuated valve.

## Optional BSR - Battery Spring Return

The BSR– Battery Spring Return kit is available as a factory installed option for Valworx 5610 series electric actuators. The BSR kit will work with both on-off models and actuators with DPS positioners. The battery failsafe system provides an alternative source of power to drive the actuator to a preset failsafe position in the event of an external power failure. The industrial quality battery is constantly trickle charged during normal operation to assure maximum charge when required. The battery kit is installed under the actuator cover. No separate modules or boxes are required.

In many applications, the BSR battery spring return function tends to be a very economical option when compared to the alternate true mechanical spring return actuator. Valworx actuators with the BSR option are much smaller, lighter and less expensive.

The installed BSR kit will provide enough power to move the actuator/valve to a failsafe position with loss of external power. The kit can be ordered as fail closed or fail open as required.

The actuator operates in the normal power open and power close mode while external power is available. Internal circuitry monitors the incoming main power and automatically switches within a few seconds to the battery backup with loss of external power. The battery will then provide enough power to move the actuator to a failsafe position. Under normal operation the external control power will trickle charge the battery and maintain a full charge.

In the normal mode of operation, an LED status light located on top of the actuator cover will be continuously lit. With a loss of power, the LED status light will blink slowly. On resumption of external power, conditional that the actuator control signal remained unchanged, the actuator will reset to the position it saw at the time of the main power failure.

### BSR Kit Ordering

Kit Stock	Description
<b>561104E</b>	5610 BSR Battery Spring Return Kit, Fail Closed
<b>561105E</b>	5610 BSR Battery Spring Return Kit, Fail Open

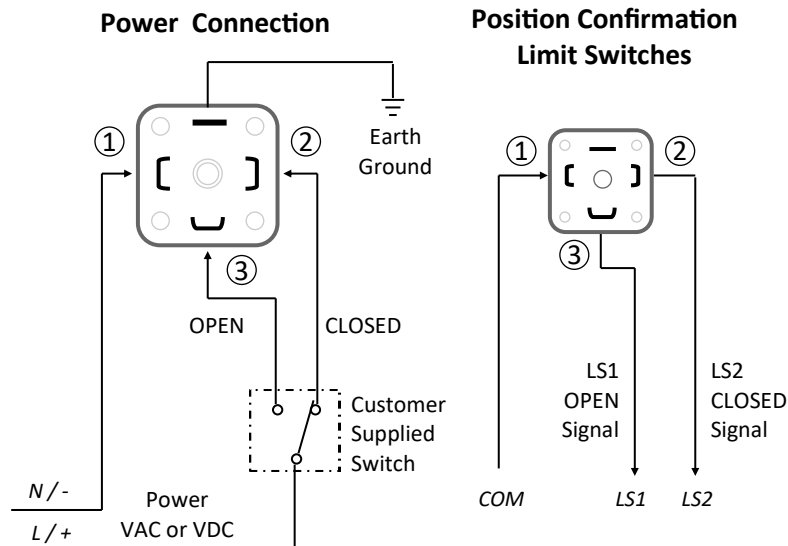

• Kits are a factory installed option. The BSR kit is automatically installed and tested when ordered with an actuated valve.

Valworx Actuator with BSR Option	
Working operations without recharge, with 100% initial battery charge	10 operations
Recharge time per working operation (sizes 1/4 - 2")	15 min
Recharge time per working operation (sizes 2-1/2" - 3")	48 min
Full Charge Time 100%	28 h

## Electrical Wiring: On/Off and BSR Battery Spring Return Versions

Voltage: 24-240 Volts AC or DC, 1 ph, - 0/+ 5 %

Auto-voltage sensing

### Function: ON-OFF version

#### Power Connections

Power to PIN 1 and 2  
- actuator CLOSED

Power to PIN 1 and 3  
- actuator OPEN

Stays in last known position  
with loss of power.

### Function: ON-OFF version with BSR option

Wiring is the same as standard ON-OFF version.

Power to open, power to close - maintain power to trickle  
charge the battery system in either open or closed position.

Actuator sent by battery power to failsafe position with power  
failure.

Actuator returns to pre-failure position on power resumption.

### Function: Position confirmation limit switches

Dry contact 3A @ 125/250  
VAC, 30VDC resistive load

PIN 1 (COM) and 2 to confirm  
actuator is closed

PIN 1 (COM) and 3 to confirm  
actuator is open

## Electrical Wiring: Actuators with DPS Digital Positioner Option

Voltage: 24-240 Volts AC or DC (auto-voltage sensing), 1 ph, - 0/+ 5 %

Analog Control Signal: 4-20mA or 0-10 VDC

### Function: Actuators with DPS—Digital Positioner Option

Power open, power close - actuator movement controlled by 4-20mA or 0-10VDC input signal.

Standard operation: 4mA or 0V = actuator closed, 20mA or 10V = actuator open (can be set-up reverse acting).

Actuator closes with loss of control signal, stays in last known position with loss of main power.

Output monitoring signal (in same format as supply signal) provided as standard.

### Function: Position confirmation limit switches

Dry contact 3A @ 125/250 VAC, 30VDC resistive load

PIN 1 (COM) and 2 to confirm actuator is closed

PIN 1 (COM) and 3 to confirm actuator is open
